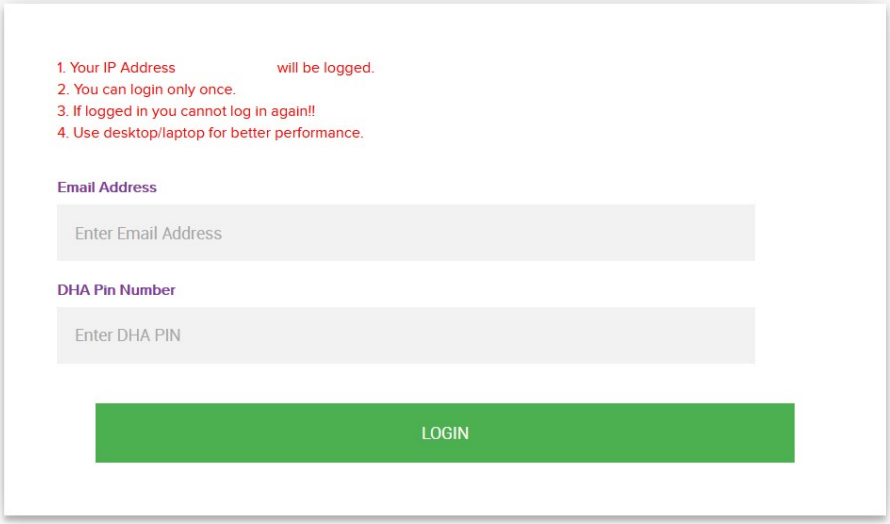
Hello future Board slayer!

It's time! We are SO excited you will be joining us virtually on January 7th-9th, 2022 by live streaming our AndyRDH's Dental Hygiene Academy review seminar. This email contains instructions how to access the live streaming link and other important information.

To access the live stream visit: https://www.andyrdhboardreview.com/streaming-login/



You will enter your email address that you used when registering and your DHA pin number to access the stream.

NOTES: Your computer or phone IP address will be saved and you can only log in once. If you attempt to log in with your pin number on more than one device at a time it will cause you to immediately be logged out of the system on the other device. Please be sure if you intend to switch devices that you log out before attempting to log in elsewhere. We may ask for you to temporarily turn on your camera at any point to maintain the integrity and security of our streaming session. Please understand we will not be able to give any technical or device support during the session so we advise to ensure you are using a reliable device with a stable internet connection. Make sure you close any other programs that may be running in the background including any other websites that may be open to avoid any video buffering on your end. The streaming will be available to access through your cellular device; however, some phone carriers can reduce your data or slow your connection so we recommend using a computer to prevent this from happening. If you are in a household that has a lot of devices connected to the same wifi, remember the more devices using the wifi, the lower quality your video may be depending on your internet plan. If you experience any issues with quality and other devices are using the same wifi as you, we recommend having the others turned off as it will help your speed.

There is no concern with security issues unless your DHA pin number is trying to view the live stream on two devices at the same time. If something happens and your browser closes or you lose connection and your browser is closed, then you can log back in with no trouble. This is designed so that you do not share your account and have your stream access being shared on two devices at once.

LIVE QUESTIONS: We are here to answer your questions live! If at any point you have any questions that you would like to ask the presenter/faculty please text our moderator at (770) 847-0332. This number will **only** be active during the duration of the seminar and is **only** for live questions. Any other questions should be sent to (770) 687-6932. Faculty can be emailed directly if you have any questions at the conclusion of their courses or seminar. Keep in mind to keep the flow of our seminar running smoothly, if a question comes in which is further into the presentation than when that specific topic was discussed (for instance if you have a question about something 10 slides previously shown) we may at our discretion hold the question for a time that is best which could be at the end of the course or afterwards. We will make every effort to read your question on your behalf as they come in.

*There will be a chat box to the right of the video where you can communicate and chat with other students. We will not be monitoring this chat area at all times, so please send questions to our text line.

BOOK: Some students don't realize that our Dental Hygiene Academy Seminar Edition app has a digital copy of the textbook that you can view right now! This is available via your mobile device or tablet. We try really hard to print as much in the book as possible so that you don't have to take as many notes so students are not writing a lot. Also, as a "thank you" for choosing AndyRDH, we are giving all of our streaming students free access to the recorded live session that you can replay anytime via our study app. We anticipate the videos will be uploaded to your app within about two weeks at the conclusion of the seminar as we need some time for our production team to edit the videos and upload to our server. If there are any sections of the seminar that you are unable to watch live, you can replay them at a later date.

PRIZES: We will be giving out a lot of prizes during the conference and will have separate chances for our live streaming attendees and our in-person attendees. The majority of the prizes will be digital gift cards so that will be emailed to you. If you win make sure you receive the email, and if you don't reach out to us via text to let us know. We will be doing a prize wheel for all virtual live stream attendees for gift cards. In addition to our live streaming prize wheel for giveaways, we will also be giving prizes based on social media posts! Take photos of you studying or viewing the stream and post on Instagram or Facebook using the #dentalhygieneacademy and we will be checking throughout the three days and will choose some to win prizes as well! Some students are streaming together as a class and some are doing it individually and we would love to see your photos! You can increase your chances of us seeing the photo by using the photo upload QR code that is in the beginning of your text book. This sends the photos directly to us. Even if you don't win a prize by posting, we will be saving as many of the photos that we can and making a slideshow to display to our attendees in person and so the rest of the country can see them! We want to include you as much as possible and so excited you will be with us virtually! If you happen to win, your prize will be emailed to you.

Schedule: Note we are streaming from our Dallas, Texas location and **keep in mind that any mention of times will be CST**. We will give start times of our day; however, we don't give specific stop times because we want our faculty to present their entire topics without being rushed or worried about time constraints and doing their absolute best presenting their courses and answering questions. Our experience with doing these seminars for many years has shown that this is best for students and we want to always do what is best for you. The majority of our topics are about two hours in length. Pharmacology is our longest course and will have a mini break in the middle, Supportive Treatment will be around 1.5 hours and Professional Responsibility around 1 hour. Keep in mind these are estimates

and our goal is not to meet a certain time frame, but rather give you everything you need to know to prepare for the NBDHE. We try our best to have as much in the text book as possible so you do not have to take a lot of notes. We want you engaged and listening with highlighting and not taking so many notes that it's hard to follow and keep up. This is a review session so you should have already been taught the material. Our goal is to go over what has a high probability of being on the exam while helping you bring everything into long term memory so that you can critically think through the answers of the questions instead of memorizing facts.

Our in-person seminar has a Kahoot study session with practice questions that you are welcome to watch. Due to there being a slight delay in streaming, we found last year that it was hard for our streaming students to participate in the same Kahoot as our in person audience and receive points for answering the questions quickly. You are welcome to participate but just know the students in person will be slightly ahead of you by a few seconds. We hope to finish **close to** 6:30 PM CST on day one and two and 5:30 PM CST on day three. Again, these are estimates but wanted to give a general idea so you can plan your day.

These will be three very long and intense days so please dress comfortably and come prepared for an amazing review!

DENTAL HYGIENE ACADEMY

LIVE STREAM SCHEDULE

FIRST DAY Friday, January 7th, 2022	SECOND DAY Saturday, January 8th, 2022	THIRD DAY Sunday, January 9th, 2022
